

**"My goal has been to produce the finest cut-off saws and scanners that can be manufactured. I believe our machines are second to none."**

LeRoy Cothrell

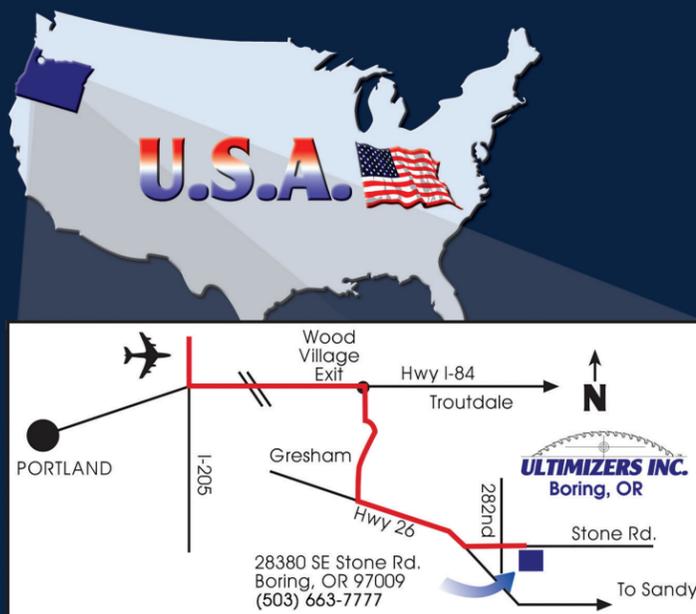

### HIGHER YIELDS

Ultimizers has led the industry since the mid-1980's with higher yields and high value optimizing. We constantly strive to improve recovery and reduce waste through modern technology.

### SERVICE AND GUARANTEE

Ultimizers has an unsurpassed service record of assisting our customers and keeping their equipment up and running. We guarantee our products and stand behind them!

### FOUR-SIDED SCANNING SYSTEM

Laser and Color Imaging is used to find Knots, Wane, Holes, Cracks, Rough Edge, Stain, and Pitch Pockets in most wood species.

The scanner frame and guarding is completely mechanically isolated from any moving part. Every camera, laser and light is solidly mounted to resist vibration that may interfere with imaging. Every device has a quick disconnect to replace items as needed without the need to rewire the system.

### FOUR-SIDED SCANNING SYSTEM

The guarding completely surrounds the scanner and lasers to keep operators safe as well as unwanted light out. Large easy open doors allow easy access to the devices for cleaning or maintenance without the need to pull the scanner out. Safety devices shut off lasers for normal operator access.
